

# Environmental Policy – August 2017

ERP UK Ltd is the UK operation for the European Recycling Platform, part of the Landbell Group, and is an approved UK Producer Compliance Scheme for WEEE, Batteries and Packaging. Our major activity is the collection and treatment of waste electrical and electronic products, waste portable batteries and waste packaging.

We believe that a healthy environment is a requirement for sustainable economic growth. And we recognise and respect that our partners and members expect us to take positive steps towards managing and improving our impacts on the environment.

On-going environmental improvement is central to our core business activity.

As part of our responsibility to the Environment, we are committed to:

- Complying with all relevant Regulations, legislation and other requirements;
- Working with regulatory agencies and advisers as necessary in the implementation of this environmental policy;
- Measuring our most significant environmental impacts and setting realistic targets for performance improvement and prevention of pollution;
- Working with suppliers who are ISO 9001 and 14001 certified wherever possible, to influence and improve quality and environmental performance;
- Where possible, increase recycling and recovery rates and avoid landfilling; and
- Promoting environmental awareness.

We will ensure that our employees, suppliers and members are aware of this policy and the opportunities that they each have to contribute to improving our performance.

We welcome comment from our partners and members on how they think we are doing and ideas on how we might improve.
